

### **EXERCISE 3-1 “Imagine this”**

Imagine this:

- Friend 1 approaches you and says: “Hey, I’ve got this great idea for selling something to students. Can I borrow \$10 to get it started?”
- Friend 2 approaches you and says: “Hey, I’ve got this great idea. Each year students buy cookies from Organization X...but, the sales do not benefit our students or the school. I can change that. I can sell similarly-priced cookies and donate \$1 to a school scholarship fund. We’d make money, and the school would make money. If you give me \$10 to help fund the purchase of cookies, I’ll give you back \$11 in a month.”

**1. Which friend would you be most comfortable entrusting with the money? Why?**

**2. If you were an employee, which friend would you prefer to work for? Why?**
